

ZION MISSION SCHOOL

COMPUTER SCIENCE PRACTICAL – CLASS XI

JAVA PROGRAMMING

Software/Tools Used: Visual Studio Code, Java JDK

Practical 1 – User Information

Question:

Write a Java program to accept the **name and age of a user** from the keyboard and display the entered information on the screen.

Concepts: Input using Scanner, variables, String, int, and output statements.

Practical 2 – Addition of Two Numbers

Question:

Write a Java program to accept **two integer numbers** from the user and calculate and display their **sum**.

Concepts: Scanner, integer variables, arithmetic operators, and output statements.

Practical 3 – Voting Eligibility

Question:

Write a Java program to accept the **age of a person** and check whether the person is **eligible to vote or not**. A person is eligible to vote if their age is **18 years or above**.

Concepts: Scanner, if-else statement, relational operator, and conditional decision-making.

Practical 4 – Grade Calculation

Question:

Write a Java program to accept the **marks obtained by a student** and display the appropriate grade according to the following criteria:

Marks	Result
90–100	Grade A
75–89	Grade B
60–74	Grade C

Below 60	Fail
0 or 100+	Invalid Marks

Concepts: Scanner, if-else-if ladder, relational/logical operators, and conditional statements.

Practical 5 – Voting Eligibility Using Nested If

Question:

Write a Java program to determine whether a person is eligible to vote based on **age and citizenship**.

The program should:

- Accept the person's **age**.
- Accept whether the person is a **citizen** (true or false).
- A person must be **18 years or above and a citizen** to be eligible to vote.
- Display an appropriate message based on the conditions.

Concepts: Scanner, Boolean variables, if-else, **nested if**, relational operators, and logical decision-making.

Practical-copy format for students

For **each of the five programs**, students should write the practical record in this order:

Ruled Page:

1. Practical No.
2. Date
3. Aim/Question
4. Tools/Software Required
5. Algorithm/Steps
6. Java Program
7. Result/Output

Blank/White Page:

- Draw or **paste the printed output/screenshot of the program execution** neatly using glue.

Lab Environment:

Visual Studio Code + Java JDK.
